MSD-BAND

RESISTIVE EXERCISE SYSTEM

MSD-BAND

RESISTIVE EXERCISE SYSTEM

LEADER IN TECHNOLOGY

What is Snap-Stop®?

Snap-Stop® makes exercising with bands much safer. This unique feature/benefit will avoid snapping, even if there's a cut or puncture. When working out with a resistive exercise band, the band has to endure extremely high tensions. A small cut can have a big consequence...

Our MSD-Band and MSD-Band Global are unique in their field. Thanks to extended research and development we achieved a special production process. This process results in a latex band that won't snap, even if there's a cut or puncture and it's exposed to high forces. This does not apply to a very old band, or band that has been exposed outdoors for some time, as well as abused bands. First advise still remains to use a fresh and clean sheet of band.

MSD-Band

See for yourself:

Different brands, different purposes

BRANDS

MSD-Band products (Global & Latex-Free included) are mainly Resistive Exercise products. Lower resistances are focused on physiotherapy, while the heavier resistances are ideal for fitness training.

Manus labelled products are helpful devices for hand therapy after an injury. In addition to early rehabilitation, these product can be used for muscle building too.

Our Mambo Max products are the go-to-products for wellness, fitness and strength training at an affordable price tag. Combine various products for a complete workout, without leaving the house.

Social Media

Here you will find our latest news and useful information. Like or follow our pages for a higher brand awareness to create a bigger demand. Our pages are continuously monitored to answer your questions as soon as possible. At first we will be active on Facebook and LinkedIn, other Social Media tools can be added afterwards.

By making our exercises available on our websites, we not only reduce our ecological footprint by cutting down on the number of unused prints, it allows us to keep costs low and offer you better value-for-money.

Extra Information

In order to keep all the information in this catalogue as clear and easy accessible as possible, we use a system of icons that are shown next to the product where applicable.

Contains multilingual instructions.

Packed in a polybag with full colour header.

Packaging contains printed exercises.

Packed in a full colour cardboard box.

Packed in a shrinkfoil wrap.

Downloadable exercises available on our websites.

Packed in a blister pack with full colour insert.

Comes with a pump.

RESISTIVE EXERCISE SYSTEM

MSD-BAND

RESISTIVE EXERCISE SYSTEM

ONE-STOP-SHOP FOR ALL YOUR BANDS AND TUBES.

With MSD-Band, MSD-Band Global and MSD-Band Latex-Free, MSD Europe is the one-stop-shop for all resistive exercise bands. MSD Europe offers both original colour sequence and global colour sequence. In addition, we also offer a range of Latex-Free resistive exercise bands. Our tubes and loops are available in the Original and Global colour sequence.

The latex bands, tubes and (super)loops are made of high quality latex from huge rubber tree plantations in Malaysia. They have an extraordinary elasticity and linearity. Together with the unique Snap-Stop® feature, they are your ideal partner for your physiotherapy trainings or intensive work-outs. The various different resistances allow you to use MSD-Band for rehabilitation as well as for fitness.

MSD-Band Latex-Free is made from TPE, to the same high quality standards as the regular MSD-Band. Never before were the characteristics from Latex-Free bands so close to those from their latex counterpart.

Check www.msd-band.com to discover the complete range of products and all possible exercises.

RESISTANCE - MSD-BAND (GLOBAL) vs. MARKET LEADER

▲ MSD-Band
■ Market Leader

Thin
Medium
Heavy
Extra Heavy
Special Heavy

MSD-Band (Global) can be stretched up to 600% elongation! MSD-Band (Global) is therefore your perfect partner for a rehabilitation programme or a full body work-out. Even after an effective training with amazing results, the MSD-Band (Global) allows you to use the same band again. When you pre-stretch your band, you will be able to achieve higher forces without having to worry about the 'elastic stop', the point where the band feels like a regular string. Most competitor's bands are not to be stretched more than 3 times their resting length, while MSD-Band (Global) achieves easily the double, while maintaining its amazing elasticity.

These specifications apply to all MSD-Band (Global) resistances. The high-quality material enables you to have a much wider array of resistances and possibilities compared to the competitors. At the start of your exercise, the band already gives some resistance, which allows you to achieve much better results than when the band is at its resting length.

The Original

MSD-BAND

RESISTIVE EXERCISE SYSTEM

MSD-Band is a premium quality, low powder (in fact, less than 2mg/dm², so we're officially powder-free) latex resistive exercise band. The unique Snap-Stop[®] fabrication process makes this product extremely tear resistant. Using the MSD-Band for resistive exercises provides positive as well as negative forces on the muscles and improves the range of motion, the strength and the cooperation of the muscle groups. The 8 different resistance levels are determined by the thickness of the band. These bands are available in 5 lengths and come with a full colour manual.

Dispenser: 25 pieces of 1,5m high quality MSD-Band in a sealed polybag in a great OTC dispenser box.

1,5m: 10 pre-cut pieces of the same resistance or 5 pieces of different resistance. (yellow, red, green, blue and black) that come in separate polybags with header.

2,5m: 10 pre-cut pieces of the same resistance or 5 pieces of different resistance. (yellow, red, green, blue and black) that come in separate polybags with header.

5,5m: A small roll of our premium MSD-Band.

22,5m: A medium roll of our premium MSD-Band.

45,5m: A big roll of our premium MSD-Band.

The production of MSD-Band starts deep in the humid forests of Malaysia, where the best and strongest trees provide the natural latex rubber that will be processed from a milky fluid to your preferred resistive exercise band. When a tree is 5 - 6 years old, harvesting can begin: incisions are being made orthogonally in the bark of the tree, just deep enough to tap the latex vessels without harming the tree's growth. The fluid is collected in small buckets, a process known as rubber tapping.

natural
100%
biodegradable

"This is why we are confident when using the words 'premium quality' when referring to MSD-Band."

Did you know that rubber trees combat greenhouse gases and thereby slowing down global warming? Additionally, latex harvesting helps prevent deforestation.

Only the best quality latex is being selected for the MSD-Band. Production starts under the constant supervision of a team of scientists, ensuring an immaculate product quality.

Latex sheets are produced, powdered, washed, dried and cut to the exact width. The amount of powder used is below the 2mg/dm² limit, which makes the MSD-Band officially powder-free. Each batch of latex sheeting that is produced, is subject to the meticulous inspection of our scientists by a series of laboratory experiments: colour-coding, dryness, tensile strength, tearing resistance, snapping resistance, ...

During the rolling process, a 100% visual inspection is being conducted on both sides of the band. Indeed, before leaving the factory, every MSD-band has been completely analysed, checked and examined to ensure premium product quality.

MSD-Band Global is a low powder (in fact, less than 2mg/dm², so we're officially powder-free) latex resistive exercise band with the same premium quality as the original MSD-Band. The difference is purely the alternative, more trendy colour sequence. The band comes in 6 different resistance levels which are determined by the thickness of the band, is available in 4 different lengths and comes with a full colour manual.

Snap-Stop[®]

▲ MSD-Band Latex-Free
■ Market Leader

We are confident that MSD-Band Latex-Free is one of the best latex-free resistive exercise bands on the market. The elasticity and linearity are simply amazing. Finally people who don't support latex can exercise with the same high quality specifications. MSD-Band Latex-Free starts from high quality thermoplastic elastomer (TPE), so it's non-toxic and completely PVC and phthalate free.

The linearity from how the strength per elongation evolves is one of the most important specifications as it offers the possibility to apply a very extended range of exercises without risking an injury due to strange product behaviour. Latex-free alternatives will reach their 'elastic stop' more quickly; this is the point where the band feels like a regular string.

We noticed a growing demand and trend for latex free products. For instance, more and more hospitals and centers aim to be completely latex free to avoid possible allergic reactions and issues for their patients. After extensive research and development, we were able to launch our MSD-Band Latex-Free. A product which we're extremely proud of.

LATEX-FREE

MSD-BAND

RESISTIVE EXERCISE SYSTEM

Thanks to our technological leadership, we achieved a Latex-Free exercise band with characteristics that were never before so close to its latex counterpart. With an exceptional 'resistance vs. elongation' linearity, we are confident our MSD-Band Latex-Free Resistive Exercise Band is the best product to fulfil your needs.

The 5 different resistance levels are determined by the thickness of the band. These bands are available in 3 lengths and come with a full colour manual.

- 1,5m: 10 pre-cut pieces of the same resistance or 5 pieces of different resistance (yellow, red, green, blue and black) that come in separate polybags with header.
- 5,5m: A small roll of our premium MSD-Band Latex-Free.
- 45,5m: A big roll of our premium MSD-Band Latex-Free.

The Original

MSD-BAND

RESISTIVE EXERCISE SYSTEM

To answer the continuously growing demand for an universal colour, we do provide our dipped, high quality MSD-Band Resistive Exercise Tubing in a different colour sequence too. These 'Global' colours are derived from the original colours, but will be applied globally as a product on its own, next to the 'Original' colours. You will find the advantages of dipped tubing on p15.

MSD-Band Global Resistive Exercise Tubing is ready to use, straight out of its polybag in a 120cm length with handles. It's also available in 30m rolls, packed in a great dispenser box. Rotation or Safety Handles offer an unlimited amount of exercises and superior grip.

As we constantly continue to develop our products, we present the amazing resistances in the table below. They are available in 6 different resistances.

COLOUR	TOTAL KG / ELONGATION %					Compares to STANDARD

The Original

MSD-BAND

RESISTIVE EXERCISE SYSTEM

The MSD-Band Resistive Exercise Tubing is a high quality tubing created by an intensive dipping process. The dipping process guarantees a multi-layered tubing, which ensures a strong and safe training product, while extruded tubings are very susceptible to damage and can easily snap. In general, dipped tubings are even more durable than bands, especially when using it on a coarse surface.

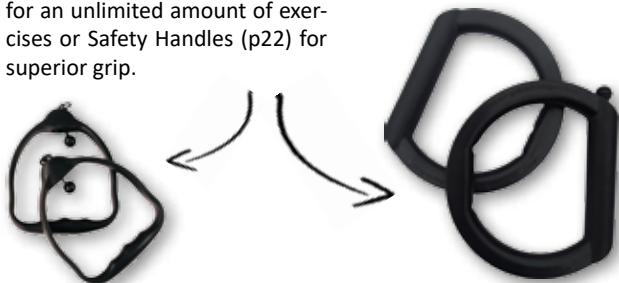

The MSD-Band Tubing is available in 7,5m and 30m rolls that are packed in a great dispenser box. In combination with rotation or safety handles, you get an unlimited amount of exercises and superior grip.

The table below shows the exceptional strength to elongation linearity from our tubing.

COLOUR	TOTAL KG / ELONGATION %					
	50%	100%	150%	200%	250%	300%
Yellow	1,0	1,5	1,9	2,3	2,9	3,6
Red	1,4	2,0	2,5	2,8	3,4	4,0
Green	2,4	3,4	4,0	4,9	5,5	6,5
Blue	2,9	3,9	4,7	5,6	5,9	7,4
Black	3,4	4,4	5,4	6,2	7,1	8,1
Silver	4,0	5,4	6,5	7,7	8,1	9,5

Use our Rotation Handles (p17) for an unlimited amount of exercises or Safety Handles (p22) for superior grip.

The Serious Strong Rotation Handle is much more than any other handle. It can be used in 3 different positions - stirrup, vertical and channel grip - and the rotational movement gives an additional range of motion. The ball lock grips virtually any exercise tubing or band and allows adjustability in resistance.

The 3 different grip options give 30% more muscle activity. These handles are perfect for a large amount of wrist, elbow and shoulder exercises for both physiotherapy as fitness training. The unique rotational movement enables even more exercises and allows you to easily increase or decrease the preload from the resistive exercise band or tubing even more.

MSD-BAND TUBING WITH HANDLES

A very useful tool for physiotherapy and muscle training is our dipped MSD-Band Tubing with Handles (120cm). These high quality and very resistant tubes are created to train all muscles in your body and improve body flexibility. The lighter resistances are perfect for physiotherapy or a light work-out, while the highest resistances will even convince the more trained athlete. The MSD-Band Tubing with Handles include a set of handles attached to a quality resistive tubing of 120cm in a polybag with header.

*DIPPED!
not extruded*

They are also available in 2 sets: the Light set includes 3 tubings of 120cm (1x Yellow, 1x Red, 1x Green) while the Heavy set contains 2 tubings of 120cm (1x Blue, 1x Black). Both come with a pair of easily interchangeable handles which can endure huge forces and are packed in a full colour cardboard packaging with butterfly hole for optimal presentation.

Separate:

- 1x Tubing 120cm of choice
- Fix handles in polybag with header.

Light Set:

- 1x Tubing Yellow + 1x Tubing Red + 1x Tubing Green
- + 1 pair of interchangeable handles.

Heavy Set:

- 1x Tubing Blue + 1x Tubing Black
- + 1 pair of interchangeable handles.

For rehab use only

Just like the MSD-Band Shoulder Rope Pulley, the MSD-Band Shoulder Tube Pulley helps increase range of shoulder motion. It can be used for prevention and rehabilitation of shoulder injuries.

Due to its resistive tubing, the MSD-Band Shoulder Tube Pulley can also be used for strength development.

The MSD-Band Shoulder Tube Pulley has a light, medium or heavy tubing.

Each pack contains the selected resistance of tubing, soft handles, pulley and door anchor.

The MSD-Band Shoulder Rope Pulley is an economical, easy-to-use device that helps increase range of shoulder motion. It can be used for prevention and rehabilitation of shoulder injuries. This easy to use shoulder rope pulley can be mounted in a doorway. It is available with notch handles or wooden handles.

The unique notch handles allow the user to easily adjust the length of the rope through the handle while the revolutionary stopper system is a great aid for consistent and progressive exercising.

The MSD-Band Shoulder Rope Pulley comes in a blister pack with a pulley, notch or wooden handles, stopper system, nylon cord and door anchor. The ECO PACK is packed in a polybag, without stoppers.

MSD-BAND KNEE ROPE PULLEY

The MSD-Band Knee Rope Pulley helps increase range of knee motion. This easy-to-use product can be mounted in a doorway to help you recover from or prevent knee injuries.

While sitting on a chair, put your foot into the ankle strap. A rope starts from the ankle strap, goes through a pulley and ends at a wooden handle designed for a 2-handed grip. Pull your foot carefully upwards by moving the handle towards your abdomen which will generate a rotational movement at your knee.

The rope length can easily be adjusted at the handle while a print on the ankle strap helps you to secure your foot in the right position. The MSD-Band Knee Rope Pulley comes in a full colour cardboard packaging with a pulley, wooden 2-handed handle, ankle strap, nylon cord and door anchor.

Multi-Layered

The MSD-Band Loop is a portable and versatile product. This "Gym on the Go" is a very effective instrument for stretching and strengthening all muscle groups.

Our Loops are multi-layered, this results in a more durable product. These thicker loops won't roll-up during exercising, avoiding the uncomfortable feeling from similar products.

Cost effective and easy to use!

Multi-Layered

The MSD-Band Global Loop is easy to use and perfect for stretching and strengthening all muscle groups. The same high quality as the regular MSD-Band Loops, but in a different colour sequence.

Multi-layered loops are more durable and won't roll-up during exercising, therefore, avoiding the uncomfortable feeling from similar products.

With the MSD-Band Global Superloop, you can easily stretch and strengthen different muscle groups. It can be used for rehabilitation and for fitness purposes. The MSD-Band Superloop is 104cm long (circumference is 208cm) and has an incredible elasticity.

The MSD-Band Superloops are multi-layered, this results in a more durable product. These thicker loops won't roll-up during exercising, avoiding the uncomfortable feeling from similar products. They are available in 5 different resistances: Peach, Orange, Lime Green, Blueberry and Plum.

MSD-BAND ANKLECISER

The MSD-Band Ankleciser is a great ankle exerciser, complying to all the rigorous quality standards MSD Europe demands of its MSD-Band brand products. It's as easy in use as it's effective. The feet slip comfortably into the latex free elastic band which consists of two stitched loops. Available in 4 different resistances, this progressive exercise system enables the user to choose the desired resistance level to perform the exercises, ranging from rehab to athlete.

Available in a set of 4 resistances, or in a 5-pack of the same resistance.

Packed in a polybag with full-colour header and exercise chart.

The spring loaded buttons of the Manus Flex-Ion isolate each digit, so the strong fingers cannot compensate for the weaker ones. This results in a better, faster and easier to control rehab process. Manus Flex-Ion is available in 6 colour coded units with gradual resistance. This gradual resistance helps the therapist measure progress. The ergonomic base adds comfort and stability. Comes with a full colour and multilingual instruction manual.

Comes in 6 different colours/resistances and with a 6-level metal display

The Digi-Extend® is a unique therapy device that can isolate the extension of all five fingers and each of the individual finger joints. The product strengthens the intrinsic and extrinsic muscle groups to maximize extensor tendon gliding, joint motion, coordination and muscle function in the hand and forearm.

The Digi-Extend® focuses on the extensor mechanism of one or all fingers as it targets the area of the hand that needs rehabilitation. Patients can easily change the resistance levels and vary their hand positions for specific exercises to help maximize the exercise goals and prevent injury. The Digi-Extend® can also be used for finger adduction, abduction, blocking and flexion exercises. It is compact in design, high-tech, easy and comfortable to use as well as effective in helping patients reach their therapy goals. Four colour coded band resistance levels allow each muscle or joint to work at a comfortable level and build as increased strength is achieved.

The VariGrip Therapy is the only exerciser with patented ability to adjust tension in each individual finger. As not all fingers have equal strength, each single finger knob can easily be adjusted. A simple wheel allows you to adjust the resistance for each finger. In addition, resistance can be increased incrementally on the patient's need, which minimises overcompensation and strain. The VariGrip allows the patient to progress steadily between resistance levels.

5 different resistance levels are available. Each VariGrip's highest resistance ends where the next VariGrip resistance starts. Any other hand exerciser increases from Light (1,4kg) to Medium (2,3kg). That's almost a 70% increase gap, which can cause an overload on the muscles, resulting in injuries. The seamless progress from one VariGrip to the other, supported by the padded finger and palm area, guarantees a safe recovery and better feel for those with sensitivity issues.

The VariGrip Therapy comes in 5 different resistances with an attractive retail-friendly packaging. The hands-on design includes informative and multi-lingual instructions.

Anti-microbial agents kill bacterium without additives and resist growth of odour-causing microbes. Manus Comfort Putty contains natural anti-microbial without addition of toxic chemicals. This additive ensures the Manus Comfort Putty material retains the clean, non-greasy feel from day one. Cheaper alternatives on the market do not contain these agents. As a small amount of bacteria and other micro-organisms will always be present on the patient's hands and because putty should be stored in room temperature conditions, anti-microbial agents are a must to avoid that the putty becomes the ideal breeding ground for bacteria and fungi. Anti-microbial agents extend the product's lifespan and improves its cleanliness

THERAFLEX PUTTY™

With anti-microbial agents

Theraflex Putty™ strengthens weakened grasp through exercise and is used for rehabilitative exercise or stress relief. It is odourless, does not stain and will not leave any residue on the patient's hands. Theraflex Putty™ is non-toxic, greaseless, hypo-allergenic and latex-free. Theraflex Putty™ is available in 5 colours/resistances and comes prepacked.

MANUS SQUEEZE BALLS & EGGS

The Manus Squeeze Ball developed to provide a progressive sequence of 5 colors. It strengthens hands, fingers, forearms and will work the muscles separately or in tandem. The Manus Squeeze Ball can be used for rehab as well as for sports training or stress relief.

The Manus Squeeze Egg is ergonomically shaped to provide highly effective exercise for the rehabilitation and strengthening of weakened or injured fingers, hands and wrists. Because it is small and easy to use, you can exercise anywhere, anytime.

Available colors/resistances: yellow, red, green, blue and black.

The Manus Squeeze Balls & Eggs can help to:

- Rehabilitate post-operative/post-traumatic hands and arms,
- Restore function in hands, arms and shoulders following stroke,
- Reduce pain and stiffness in arthritic fingers, hands and wrists,
- Relax tense, sore muscles and reduce stress,
- Strengthen aging hands and arms.

For ACTIVE and PASSIVE training.

The OxyCycle III Pedal Exerciser is a great tool for personalised, low-stress workouts that can be used anywhere. The adjustable speed and resistance makes it a great product to progressively strengthen your arms and legs. This pedal exerciser provides low impact exercise to increase strength and flexibility, is versatile for both upper and lower body and it improves the blood circulation. The OxyCycle III Pedal Exerciser has a light-weight compact design, adjustable speed & resistance, a 15-minute timer switch and a multi-function LCD display readout scan, time, count, total count and calories burned. A non-skid mat and interchangeable handgrip pedals are included.

The Saehan Cycles are professional pedal exercisers aimed at rehabilitation. Pedalling improves blood circulation and will increase strength and flexibility after an injury or for elderly.

Both the Home and Clinical Saehan Cycles include attachments to fit the pedal exerciser to a chair or even a wheelchair. The pedal exerciser's length can be perfectly adjusted to the user when his feet are fitted in the pedals with foot straps. A convenient turning knob makes it possible to adjust the resistance (0 - 13 kg) which increases or decreases the effort, resulting in a progressive exercise programme.

The Clinical version from the Saehan Cycle has an even higher level of adjustability. The distance between pedal and crank can be adjusted and the resistance knob indicates the level selected. Together with the convenient grips to attach the Saehan Cycle to a (wheel)chair and different extra accessories, this product will be an essential item in any professional's practice room.

Wall mount included

WOODEN INCLINE BOARD

The incline board increases extension in the lower and upper back while stretching the calves. It can be used:

- to improve the general posture,
- to stretch the calf muscles of athletes, soccer players and sportsperson in general,
- to stretch the upper-leg muscles (Ischias),
- to increase extension in the lower and upper back.

- 50cm x 29,5cm x 3,5cm
- Max. User Weight: 150kg

The MSD Wooden Incline Board - Ladder is made out of natural birch wood and is very resistant. It is adjustable in 4 different angles (10°, 15°, 20° and 25°). After using the MSD Wooden Incline board, it can easily be folded to achieve its compact form when not in use.

The new MSD Wooden Incline Board - Fix is perfect for who's looking for an easy and budget-friendly Incline Board. It's made of polymerised wood for a strong feel and high user weight. The inclination (17,5°) is perfect for physiotherapy exercises.

- 58cm x 30cm x 16cm
- Max. User Weight: 150kg

PLASTIC INCLINE BOARD

Apart from stretching the calf and upper-leg muscles, the incline board is a fantastic device to improve general posture and extension in the lower back.

Made of a composite plastic rated over 250kg. Adjusts to 4 levels and folds flat (8cm) to store easily. Angles are 10°, 15°, 20° and 30°. The last slot on the board makes an excellent hand-hold for stretching. Non-slip top measures 35x35 cm.

Foldable Legs

The Mambo Max Jumping Fitness Trampoline is equipped with bungee cords and a handlebar. Bungee cords protect and support joints and ligaments by providing a deeper and gentler bounce. This allows the muscles to work more, and for a longer period of time, burning calories efficiently without placing unnecessary strain on the body.

Similar to our complete range of trampolines, the Mambo Max Jumping Trampoline helps to flush the lymphatic system, where most toxins are stored. Rebounding also provides an ideal balance of gravity and weightlessness to stimulate the organs and work major and minor muscles in the body. It also serves other core functions, from digestion to mental health.

Finally, bungee trampolines tend to be quieter, sturdier and more reliable than spring trampolines, making upkeep and maintenance a breeze.

HEALTH BOUNCE POD™ *

The Health Bounce Pod™ is the only device on the market able to provide a safe and suitable environment for elderly and injured people to exercise. It is robust, balanced, adjustable, and comfortable. It has been designed by professional trampoline athletes in cooperation with doctors specialised in the field of extreme trauma and accidents.

The adjustable C-hoop, connected to the steel frame by 4 symmetrically placed springs makes it friendly to use by blind people, who can exercise freely and up to their own capability. No other form of exercise can be so easily available with true benefits, with the extra bonus of being fun!

*Product cannot be sold in the UK.

The MSD Rehab Trampoline is the offspring from the passion and dedication from MSD Europe and Active Fun. MSD Europe relies on the extensive know-how and testing results from Active Fun to offer a well-balanced trampoline, made from high-quality materials to achieve the price/quality ratio MSD Europe is known for.

This trampoline is developed starting from a strong and stable base. The high quality tapered springs will give you a very comfortable feeling while bouncing is gentle on joints and ligaments. The durable mat with centre marking will make it easier to locate the centre so both legs are equally trained. Because the removable handlebar is adjustable in 6 positions, it is the perfect companion for any (rehabilitating) patient. The soft and thick padding covers the spring to give the whole product a nice and finished look.

04-010106	Mambo Max Pilates Foam Roller - EPE 90cm	1 pc

The Mambo Max Foam Roller has been designed for Pilates training and spine exercises (back aches). Ideal for balance and stabilisation exercises. Foam rollers are used for stretch and strength exercises, as well as for massage and relaxation. Available in EVA and EPE.

Foam covered fiberglass resistive exercise ring with foam padded grips. For exercises focusing on strength, balance, flexibility and posture. The Mambo Max Pilates Ring adds light resistance to pilates exercises and helps target specific muscle groups. Often used to help tone the arms and thighs, and increase the core strength challenge of an exercise.

Ø 38 cm

Massage rollers are used to put pressure on the muscles' triggerpoints and to loosen the tension in the muscles. Trigger points are often the cause of different pains.

Ø 14cm
↔ 33cm

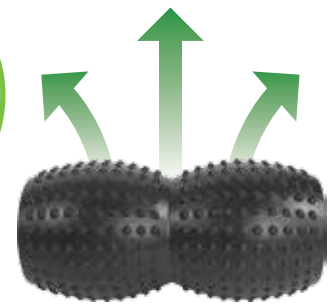

The Mambo Max Hollow Foam Roller can easily help people who are experiencing long term pains. Its three dimensional pattern with different shapes replicates the massage from a therapist's hands. The larger surfaces allow a superficial massage while the smaller shapes are designed for a deeper massage.

Ø 15cm
↔ 33cm

The Mambo Max Ergonomic Foam Roller is a curved hollow foam roller, which enables more exercises. Except rolling back and forth, it's possible to make sideways movements. More muscles will be addressed through which the body will be toned even more. The soft foam in combination with the nipples is perfect for trigger point massages. The central groove will reduce pressure on the spine.

NEW

The Mambo Max 3-in-1 foam roller combines 3 different foam rollers in one package. Thanks to its smooth surface, the outer part is perfect for a superficial massage. The second part has grooves which can be used for a deeper massage and to exercise higher pressure on the trigger points. Finally, with the inner massage stick it's possible to exercise high pressure on sore muscles to improve blood circulation and the muscles' recovery time. This last item is available as a separate product too: The Mambo Max Massage Stick.

MAMBO MAX AB GYM BALL

Ecofriendly pvc - Heavy metal content in compliance with EN 71 Standards - Phthalates content meets EU-directive 2005/84/EC.

ANTI-BURST

350 kg
Yes, 350 kg!!!

The Mambo Max AB (Anti-Burst) Gym Ball increases flexibility, improves strength, fitness and posture. Exercising with this ball also enhances your balance and coordination. All AB Gym Ball, the Peanut Ball is Anti-Burst too. In case the ball gets punctured by a sharp object the ball won't burst, thus reducing risk of injury.

This extremely durable Mambo Max AB Gym Ball comes in a Mambo Max cardboard retail pack, including AB Gym Ball, Faster Blaster Pump, Exercise Chart, Plug and Plug Remover.

The Mambo Max AB Gym Ball is now also available in the budget pack: a polybag containing only the ball and plug.

MAMBO MAX AB PEANUT BALL

NEW

ANTI-BURST

This new addition in our AB (Anti-Burst) Gym ball range helps users who struggle with the instability of a regular gym ball. The peanut shape offers extra sideways stability, which gives more confidence to start working out with Gym Balls. The Mambo Max AB Peanut Ball offers a more predictable therapy or fitness training as it can only roll in one direction. This certainly is a huge benefit for children, elderly or people who suffered an injury. In addition, Peanut Balls are very popular amongst pregnant women and are very helpful devices during labour.

Similar to our regular Mambo Max AB Gym Ball, the Peanut Ball is Anti-Burst. In case the ball gets punctured by a sharp object the ball won't burst, thus reducing risk of injury.

The Mambo Max AB Peanut Ball comes in a Mambo Max cardboard retail pack, including Faster Blaster Pump and Plug.

MAMBO MAX AEROBIC STEP

Step aerobics is a form of aerobics that is practised worldwide by millions of people. The reason for its popularity is simple, it offers a great cardio workout without the need for extensive space or equipment. While the aim of aerobics is to increase the body's consumption of oxygen, step aerobics builds on that goal by offering a more intense workout. The Mambo Max Aerobic Step provides this extra boost by incorporating the action of stepping onto the platform to intensify the workout. It is low impact, and doesn't stress the joints as much as running or jogging.

The Wooden Balance board is available in 3 versions: Uni-Directional, Rehab & Sport. Their different form and balance point make it possible to have 3 products with a very different character and level of difficulty.

Children and elderly could experience a balance board with pivot point as too challenging. The Uni-directional Balance Board offers more confidence. This enables the user to improve body stability without the fear of falling.

A Uni-directional Balance Board offers a more predictable therapy or fitness training as it can only pivot in one direction. When turning the Balance board upside-down, the arches can be used as push-up grips. Once the user is ready for the next level of training, the Balance Board Rehab or Sport are ideal next steps in the process.

The Balance Board Rehab is lower than the Balance Board Sport. In addition with its smoother pivot point, it reacts completely different than the Sport. It's a great middle step between the Balance Board Uni-Directional and Balance Board Sport.

The most challenging Balance Board is our Sport version, which, as the name specifies, makes it a real sport. Finding your balance and avoiding the edges to touch the ground is hard and requires you to use all your muscles in your body. It's a great and fun way to exercise a full-body workout.

The MSD Rehab Trampoline is the offspring from the passion and dedication from MSD Europe and Active Fun. MSD Europe relies on the extensive know-how and testing results from Active Fun to offer a well balanced trampoline, made from high-quality materials to achieve the well known price/quality ratio of MSD Europe.

This trampoline is developed starting from a strong and stable base. The high quality tapered springs will give you a very comfortable feeling while bouncing is gentle on joints and ligaments. The durable mat with center marking will make it easier to locate the center so both legs are equally trained. Because the removable handlebar is adjustable in 6 positions, it is the perfect companion for any (rehabilitating) patient. The soft and thick padding covers the spring to give the whole product a nice and finished look.

HEALTH BOUNCE POD™*

The Health Bounce Pod™ is the only device on the market able to provide a safe and suitable environment for elderly and injured people to exercise. It is robust, balanced, adjustable, and comfortable. It has been designed by professional trampoline athletes in cooperation with doctors specialized in the field of extreme trauma and accidents.

The adjustable C-hoop, connected to the steel frame by 4 symmetrically placed springs makes it friendly to use by blind people, who can exercise freely and up to their own capability. No other form of exercise can be so easily available with true benefits, with the extra bonus of being fun!

*Product cannot be sold in the UK.

Our brand new Mambo Max Jumping Fitness Trampoline is equipped with bungee cords and a handlebar. Bungee cords protect and support joints and ligaments by providing a deeper and gentler bounce. This allows the muscles to work more, and for a longer period of time, burning calories efficiently without placing unnecessary strain on the body.

Bungee cords

Ready to use

Foldable Legs

Similar to our complete range of trampolines, the Mambo Max Jumping Trampoline helps to flush the lymphatic system, where most toxins are stored. Rebounding also provides an ideal balance of gravity and weightlessness to stimulate the organs and work major and minor muscles in the body. It also serves other core functions, from digestion to mental health.

Finally, bungee trampolines tend to be quieter, sturdier and more reliable than spring trampolines, making upkeep and maintenance a breeze.

AQUATIC PULL BUOY

The Aquatic Pull Buoy is a figure-eight shaped floating device used in swim workouts. Place the buoy between the legs to provide support to the body without kicking the legs, allowing focus on training only the arms. The Aquatic Pull Buoy is an excellent training device for developing endurance and upper body strength. Good body position and technique can be established and breathing rhythm can be refined. It also provides individuals with heavy legs to be better positioned in the water.

A medicine ball (also known as an exercise ball, a med ball, or a fitness ball) is often used for rehabilitation and strength training as it plays an important role in the field of sports medicine. Medicine ball training is one of the oldest forms of strength and conditioning training – the first reference to wrestlers training with sand filled bladders appears in Persia nearly 3000 years ago. In ancient Greece the physician Hippocrates had his patients throw them back and forth for injury prevention and rehabilitation.

The Para Pro is a professional paraffin wax heating bath which is made to be used on 220/230 Volt power sockets and which can be used 24/7. In combination with our premium paraffin pearls it only needs 2,5 hours to completely melt 2,5kg of paraffin. The temperature is adjustable from 40-60°C and is easy to control due to the digital thermometer.

When ordering the Para Pro, you receive 2,5kg of paraffin pearls free of charge.

Para Pro Specifications:

- Outer dimensions: 39cm x 25cm x 18cm (l x w x h)
- Inner dimensions: 32,5cm x 18cm x 13cm (l x w x h)
- Weight: 3,1kg
- 220 V: No transformer needed, which will lengthen the durability.
- Low power consumption once the paraffin has melted
- 24-hours a day fully operational
- Quick melting (+- 2,5 hours)
- Adjustable temperature button (40 - 60°C)
- Digital thermometer

Paraffin Specifications:

- White fully refined paraffin wax, 52/54 DAB
- Congealing point: 53°C
- Meets the purity requirements of BGA¹, Ph.Eur.² and FDA³

1. Bundesgesundheitsamt recommendation No. XXV B II;
 2. European Pharmacopoeia, current edition;
 3. Food and Drug Administration, § 172.886 Petroleum Wax

The MSD Hot/Cold Packs are usable both when treating with heat or cold. This dual applicability makes them a strong alternative to ordinary heating pillows and ice packs. The versatile, reusable packs deliver hot and cold therapy effectively and economically. The use of the MSD Hot/Cold Pack is unlimited and its material is non-toxic. Even below -20°C it remains soft. The MSD Hot/Cold Pack can be bent in any angle, allowing maximum coverage of joint and muscle. All Hot/Cold Packs can be heated in the microwave and can be frozen in the freezer. Temperature holds approximately 30 minutes.

MSD Hot/Cold Pack | Classic - Gel

The classic (and economical) transparent Hot/Cold Pack. The special gel is non-toxic and biodegradable.

MSD Hot/Cold Pack | Standard - Gel

MSD Europe's standard Hot/Cold Pack. Nylon cover gelpack. The special gel is non-toxic and biodegradable.

MSD Hot/Cold Pack | Soft Touch - Clay

The Soft Touch improved and has a frost-free, user friendly surface that allows usage in direct contact with the skin. The Soft Touch is filled with clay, a 100% natural product.

RESISTIVE EXERCISE | HAND EXERCISE | UPPER & LOWER BODY EXERCISE | WELLNESS | FITNESS | STRENGTH | THERMAL TREATMENT | MEASUREMENT INSTRUMENTS

PearlPacks are reusable Hot/Cold Packs filled with small pearls. Hot and Cold Therapy can be applied to relieve pain and inflammations associated with muscle strain and sprain. This dual applicability makes them a strong alternative to ordinary heating pillows and ice packs. The small pearls absorb heat or cold, which they can retain for 20 minutes. During these 20 minutes, these packs will relieve a part from the pain.

PearlPack Sport Pack

This portable classic pack can be applied on any part of the body.

PearlPack Back Wrap

This large pack divided in 3 segments is equipped with velcro strap. It fits perfectly around the patient's waist for an optimal pain relief on the back. The pearls can be pushed from one segment to the other if one area of the back needs less or more thermal treatment.

PearlPack Eye Mask

This mask adapts to the patient's face, the length from the velcro strap is adjustable. Hot treatment can be applied when eyes feel dry or if there's an infection of the eyelid. Cold treatment will help when suffering from headaches, swollen eyes or sinusitis.

Not only do they look good, the products are very convenient in use. PearlPacks won't feel wet nor drip after freezing or heating them, avoiding a mess. All material used is non-toxic and odourless.

Besides relieving pain from an injury or muscle strain, hot/cold packs are often used to reduce swelling after an operation. PearlPacks truly are multifunctional products.

SAEHAN HYDRAULIC PINCH GAUGE

The Hydraulic Pinch Gauge uses the improved hydraulic system of the hand dynamometer to assure convenience, product reliability, measurement accuracy and repeatability. This results in a more accurate test result for all pinch tests.

Range: 0 - 20kg (45lb)

Quality Soft Pouch Case

Grip **SAEHAN**®

SAEHAN DIGITAL HAND DYNAMOMETER WITH G-STAR™ SOFTWARE - DHD-3

Quality Hard Case Box

The DHD-3 Digital Hand Dynamometer (SH1003) provides the same features as the DHD-1 when used as a stand-alone device, but adds automated Rapid Exchange Grip Testing. Using Auto Mode, up to 10 strength tests for each hand as well as the time allowed to switch hands can be configured to automate the testing procedure.

The Grip Strength Testing and Research (G-STAR) software extends the DHD-3 capabilities even further. G-STAR is an easy to use, yet powerful software tool which automates grip strength testing and endurance testing in both clinical and research environments. All patient information and their test results are stored in an Access database which includes normative score tables for comparison based on age and gender. Maximum grip strength and grip endurance tests are graphically displayed during testing and can be saved in the database with their associated patient information. In addition, tests saved in the DHD-3 itself when used as a stand-alone device, can be imported into the database when re-connected to the PC using G-STAR.

Range: 0 - 90kg (200lb) / Minimum requirements: Windows XP + USB port

MEASUREMENT INSTRUMENTS

Reference	Description	Unit
08-020301	Psytech Finger Flexion / Extension Gauge	1 pc

The Psytech™ gauge measures individual finger flexion strength and extension strength. Separate scales record each measurement in both pounds and kilograms. Maximum reading remains until reset.

Flexion capacity: 9kg
Extension capacity: 2,2kg

Dimensions: 10 x 15 x 10 (mm)

INCLINOMETER

Baseline's Bubble® and Digital Inclinometers are used to measure range-of-motion (ROM).

Reference	Description	Unit

SAEHAN BACK-LEG-CHEST DYNAMOMETER

Reference	Description	Unit
08-010601	Saehan Back-Leg-Chest Dynamometer	1 pc

Measure strength of back, leg and chest. Base provides secure footing. Chain length is adjustable to accommodate for height differences or to vary the point of force application. Shows pounds and kilograms. Pointer remains at maximum until reset. Comes fully assembled with 1,5m chain. Range: 0 - 300kg (660lb)

CE Grip **SAEHAN**®

PUSH-PULL DYNAMOMETER

A simple, easy-to-use, ergonomically designed instrument that objectively measures push, pull and lift forces for manual muscle testing, functional capacity evaluation and job task evaluation at a remarkably affordable price. Because the instrument is lightweight, small and portable, you can perform precise, objective evaluations in your office or at the patient's location. The easy-to-attach dual grip handle can be used when measuring larger forces. Lift platform and chain to perform lifting evaluation not included.

Range: 0 - 45kg (100lb)

Quality Hard Case Box

PRIVATE LABELS

MSD-Band is a great product, but you would like your brand on the band, loop, superloop...? We'll do it!
Together with our manufacturers from all the products in our range, we can create your desired product with the look you want. We can replace our logo with yours, change the colour, even the packaging can be tweaked to your needs. Private Labels will allow you to design the product the way you want to match it to your company's identity.

Private Label products have the same quality as all our products, but are putting your brand in the spotlights. This is perfect if you need a homogeneous range of products or want to increase your brand awareness. Or maybe you're looking for a one time opportunity: a promotional product during your company's special occasion, a gift for visitors or an event you're supporting?

Please contact us for more information about pricing and volume.

CREATE YOUR PRODUCT / PRODUCT KIT *

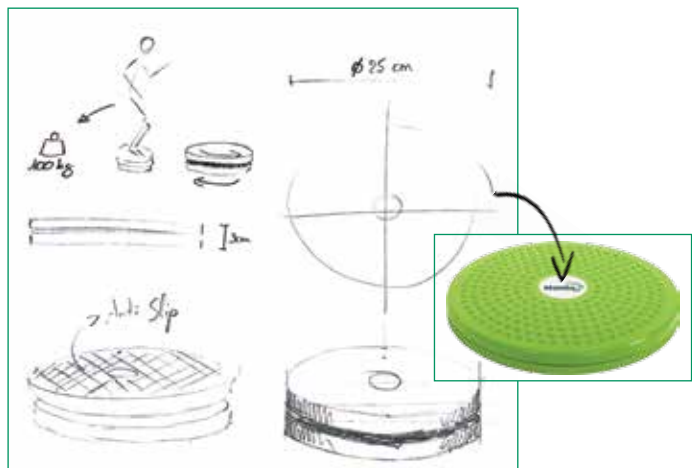

Do you have a project in mind but you don't know how to start? Do you need some support to bring your plans to life? Do you want to target a specific group of customers with a unique sport or rehabilitation kit? Or are you looking for original gifts for special occasions?

As master distributor and manufacturer we have the worldwide contacts and resources to achieve the best possible result. Our product developer will help you to go through the required steps and avoid any inconvenient surprises.

Contact us at MSD Europe and we will help you to bring your product plans to life or create that special sport or rehabilitation kit. We will assist you to find the right products and packaging for a successful project.

* Starting from a specific volume/value, please ask for more information.

Measurement Instruments are calibrated at manufacturing with a full one year guarantee, before sending them to users all over the world. Ideally, these instruments should be recalibrated every year.

In order to make this happen in an easy and inexpensive way, Hydraulic Hand Dynamometers (Saehan, Jamar, Baseline...) and Hydraulic Pinch Gauges are recalibrated by our experts at the MSD Europe Service Centre in Tisselt - Belgium. This operation consists of re-establishing the exact relationship between the force applied to a dynamometer and the measurement it shows. Small repairs can be done as well.

Simply send your request to our customer service department for a return authorisation number. After each recalibration, you will receive an updated calibration certificate, certifying accurate and repeatable test results.

If you have many calibrations to do, you might consider buying your own calibration unit.

MSD EUROPE REPAIR CENTRE

Since machines are designed and assembled by humans, they are not flawless. That is why MSD Europe installed an inhouse repair centre, to swiftly and correctly solve any problems that may occur with our products.

No matter what the cause, be it faulty fabrication or misuse, our technician will shine his light on the problem.

Send an email to our customer service department to inform us on the type of problem and the serial number/production date of the device. After our authorisation, please send over the patient, accompanied by your name and client number and a brief description of the symptoms. We'll do our best to have him cured in no time.

1. Terms: prepayment, unless otherwise specified. Buyer should bear all bank charges.
2. Minimum purchase value: All orders must have a minimum purchase value of € 250,00. For smaller orders, an administration fee of € 10,00 will be charged.
3. Freight Terms: prices are ex-works Tisselt, Belgium. All shipping/delivery costs are at charge of the buyer, unless otherwise specified.
4. Prices: all prices for merchandise purchased are based on seller's price list in effect on the time of shipment. Prices can be subject to change without notice.
5. Claims: unless otherwise provided for herein, claims of any kind in goods sold by seller shall be made by buyer to seller, in writing, within a period of seven days after such goods are delivered to buyer.
6. Credit and Exchange: written authorisation must be obtained before returning merchandise for credit or exchange. When requesting return authority, product lot number and/or manufacturing date and/or expiration date should be included.
7. Finance Charge: a finance charge of 1% per month (12 % per annum) will be added to all amounts past due. A penalty of 15% on value, with a minimum of €40,00 for late payment will be added. Terms of payment are from date seller's invoice and not contingent upon delivery.
8. Governing Law: all disputes arising out of all sales by seller to buyer shall be governed by the laws of Belgium. Only the courts covering the territory of the company's operational seat will be qualified in case of dispute.
9. Warranties: seller warrants that it has good title to the goods purchased by buyer and that its good will conform to buyer's specifications, if any, except as otherwise provided herein. All other warranties, whether express or implied, and including, but not limited to, the warranty of merchantability and fitness for a particular purpose are excluded. In all events, buyer's sole and exclusive remedy shall be limited to the amount of the purchase price of any product on which a claim is made as its exclusive remedy for breach of the warranty expressed herein and for negligence and otherwise. Under no circumstances shall seller be liable to buyer or any other person for consequential or incidental damages.
10. Property: seller has the exclusive property on the delivered products until buyer has paid the full amount due. This also implies that if buyer does not pay in time, seller has the right to, without prenotice, claim back the delivered goods.
